

12 reasons to have a CaveSim school program:

- 1) Educational. Students will learn important core content (mostly science/STEM, but also social studies, PE, and teamwork/communication/leadership lessons).**
- 2) Aligned with state academic standards, and tailored to what students are currently learning in the classroom.**
- 3) Makes learning exciting and fun. Students will be reminded of why school is important, and they'll see examples of the cool things that can be done with a good education.**
- 4) This is an at-school field trip. No busing required. No special lunch situation to coordinate. Easy to chaperone.**
- 5) Minimal disruption to normal schedule. The program schedule is set based on the school schedule. If needed, students can attend specials.**
- 6) Lots of other schools have been successful with this program. Over 25,000 kids have participated in CaveSim programs, and over 77 schools have had the program since 2010.**
- 7) Very reasonable per-student cost for such a high-quality program (visit cavesim.com/schools/pricing#options for per-student cost)**
- 8) Simple to arrange. No CaveSim contracts to sign. No deposits required.**
- 9) Expert staff. Programs are led by a cave expert with 2 degrees from MIT.**
- 10) Physically engaging. Students are physically active during the entire program, and also learning the whole time.**
- 11) Safe. CaveSim has a perfect safety record.**
- 12) Novel. This is a chance to offer something that other schools aren't offering.**
